“

Thanks to carvelo, we from the cooperative settlement „Oberfeld“ can easily share an eCargobike. Booking, billing and insurance work practically without any effort on the part of the settlement. We love our „e-Donkey“, especially the children for the trip to the swimming pool or the camping weekend!

The example of the Cooperative Holunder in Bern

- The low car density housing cooperative „Holunder“ is investing in an electric Cargobike in order to provide its residents with a **CO₂-free mobility tool for shopping, recycling and leisure activities**.
- The Carvelo is made available to a closed user group in the neighborhood
- In order to make the pick-up and return of the Carvelo as easy as possible, the settlement has had a Carvelobox installed to ensure automated 24/7 access to the Carvelo.
- The housing cooperative transfers the operating fee for the Carvelo to the rental prices of the flats and offers all residents 7 free days of rental in return. Beyond that, they pay the normal carvelo rate and have **access to a further 400 shared Carvelos throughout Switzerland via the platform**.
